

CONTENTS

NO. 1, JANUARY 1969

Antimicrobial Agents and Chemotherapy

Micromethod for Assaying Serum Levels of Erythromycin. STANLEY C. BELL, J. WAYNE HAMMAN, AND WALTON E. GRUNDY.....	88
Simple Isolation of Antimycin A ₁ and Some of Its Toxicological Properties. P. B. HAMILTON, F. I. CARROLL, J. H. RUTLEDGE, J. E. MASON, B. S. H. HARRIS, C. S. FENSKE, AND M. E. WALL.....	102
Mode of Action of the Antibacterial Compound Dequalinium Acetate. W. B. HUGO AND M. FRIER.....	118

Clinical Microbiology, Virology, and Immunology

Inactivation of Poliovirus Type 1 by the Kelly-Purdy Ultraviolet Seawater Treatment Unit. WILLIAM F. HILL, JR., FREDERICK E. HAMBLET, AND WILLIAM H. BENTON...	1
Rapid Fluorescent-Antibody Staining Technique. ALICE J. MARTIN AND ROBERT F. BIGWOOD, JR.....	14
Method for Testing Virus Stocks for Viral Contaminants. BETTYLEE HAMPIL AND JOSEPH L. MELNICK.....	17
Acrylamide Gel Electrophoresis of Group A Streptococcal Cell Walls. SANDRA A. LARSEN, C. DOUGLAS WEBB, AND MAX D. MOODY.....	31
Vaccinia Neutralization Test Using a Radioisotope Assay for Virus-induced Enzyme Activity. DONALD W. ZIEGLER AND HARRIET D. HUTCHINSON.....	41
Production of Photons in the Bactericidal Effect of Transient Electric Arcs in Aqueous Systems. L. EDEBO.....	48
Virucidal Effect of Transient Electric Arcs in Aqueous Systems. M. P. SINGH, S. HERMODSSON, AND L. EDEBO.....	54
Influence of the Conductivity of the Discharge Liquid on the Microbicidal Effect of Transient Electric Arcs in Aqueous Systems. L. EDEBO, T. HOLME, AND I. SELIN.....	59
New Medium for Blood Cultures. JOSEPHINE A. MORELLO AND PAUL D. ELLNER.....	68
Electronic Data Processing System for the Clinical Microbiology Laboratory. DANIEL AMSTERDAM AND S. STANLEY SCHNEIERSON.....	93
Prevalence of Serotypes of <i>Salmonella</i> . WILLIAM J. MARTIN AND WILLIAM H. EWING.....	111
Influence of Bacterial Infection on Serum Enzymes of White Rats. JOHN M. WOODWARD, MARK L. CAMBLIN, AND MARTIN H. JOBE.....	145
Immunological Properties of Friend Virus from Mouse Spleen Obtained by Gel Filtration. S. P. CHAN, M. A. CHIRIGOS, AND W. A. HOOK.....	157
Factors Affecting the Growth of Canine Herpesvirus in Dog Kidney Cells. LAURE AURELIAN.....	179
Acid-tested, Heated Serum Derivative for Culture Media for <i>Leptospira</i> . S. FAINE.....	185
Enhancement of the Infectivity of Rhinovirus Ribonucleic Acid by Diethylaminoethyl Dextran. MILAN FIALA AND BRUCE SALTZMAN.....	190

Food and Deterioration

Effect of Nitrofurans and Chlortetracycline on Microorganisms Associated with Shrimp. MELVIN E. WATERS AND M. K. HANDY.....	21
<i>Herellea (Acinetobacter)</i> and <i>Pseudomonas ovalis</i> (<i>P. putida</i>) from Frozen Foods. CHARLES ELLER.....	26
<i>Staphylococcus aureus</i> Response to Lysostaphin in Some Fermented Foods. ROBERT H. METCALF AND R. H. DEIBEL.....	63
Bacterial Infection of Washed and Unwashed Eggs with Particular Reference to <i>Salmonellae</i> . B. E. MARCH.....	98

Effects on Growth and Toxin Production of Exposure of Spores of <i>Clostridium botulinum</i> Type F to Sublethal Doses of Gamma Irradiation. N. J. WILLIAMS-WALLS....	128
Protein Quality of the Bacterium <i>Hydrogenomonas eutropha</i> . DORIS H. CALLOWAY AND ADARSH M. KUMAR.....	176

Ecology and Taxonomy

<i>Neisseria lactamicus</i> sp. n., a Lactose-fermenting Species Resembling <i>Neisseria meningitidis</i> . DANNIE G. HOLLIS, GERALDINE L. WIGGINS, AND ROBERT E. WEAVER...	71
Heat Resistance of <i>Salmonella</i> : the Uniqueness of <i>Salmonella senftenberg</i> 775W. HENRY NG, HENRY G. BAYNE, AND JOHN A. GARIBALDI.....	78
Laboratory Identification of <i>Rothia dentocariosa</i> and Its Occurrence in Human Clinical Materials. JUNE M. BROWN, LUCILLE K. GEORG, AND LINDA C. WATERS.....	150
Vacuum Probe: New Approach to the Microbiological Sampling of Surfaces. W. J. WHITFIELD, J. W. BEAKLEY, V. L. DUGAN, L. W. HUGHES, M. E. MORRIS, AND J. J. MCDADE.....	164
Staining of Acid-fast Bacilli Between Silicone Layers. LASZLO KATO AND BELA GOZSY..	182

Metabolism and Products

Retting of Flax by <i>Aspergillus niger</i> . F. P. DE FRANÇA, J. A. ROSEMBERG, AND A. M. DE JESUS.....	7
Fermentation of Philippine Vegetable Blends. C. A. ORILLO, E. C. SISON, M. LUIS, AND C. S. PEDERSON.....	10
Micro Radiometric Method for Study of Acid-insoluble Materials in Monolayer Cell Cultures. DONALD W. ZIEGLER, HARRIET D. HUTCHINSON, AND ERSKINE L. PALMER.....	34
Volatile Fatty Acids and the Inhibition of <i>Escherichia coli</i> Growth by Rumen Fluid. MEYER J. WOLIN.....	83
Procedure for Evaluating the Effects of 2,450-Megahertz Microwaves upon <i>Streptococcus faecalis</i> and <i>Saccharomyces cerevisiae</i> . R. V. LECHOWICH, L. R. BEUCHAT, K. I. FOX, AND F. H. WEBSTER.....	106
Growth of <i>Chlorella sorokiniana</i> at Hyperbaric Oxygen Pressures. B. RICHARDSON, FRED W. WAGNER, AND B. E. WELCH.....	135
Oxygen-tolerant Strain of <i>Chlorella sorokiniana</i> . FRED W. WAGNER AND B. E. WELCH..	139
Effect of Cold Temperatures on the Viability of <i>Chromobacterium violaceum</i> . MARY H. EFTHIMION AND WILLIAM A. CORPE.....	169
Slicer for Use in Agar Gel Electrophoretic Analysis of Enzymes. CALDERON HOWE, LUCILLE T. LEE, AND ODD OTTERSEN.....	183
Effect of Soya Flour on the Lactic Fermentation of Milled Corn. I. A. AKINRELE, A. MAKANJU, AND C. C. EDWARDS.....	186
Mechanism of Overproduction of Orotic Acid by a Mutant of <i>Brevibacterium ammoniagenes</i> . HELENA ŠKODOVÁ AND JAN ŠKODA.....	188

No. 2, FEBRUARY 1969

Antimicrobial Agents and Chemotherapy

In Vitro Effect of Rifampin on Mycobacteria. VICTOR LORIAN AND MAXWELL FINLAND.....	202
Frequency of R Factor-mediated Multiple Drug Resistance in <i>Klebsiella</i> and <i>Aerobacter</i> . VIRGINIA HINSHAW, JAMES PUNCH, MARVIN J. ALLISON, AND HARRY P. DALTON....	214
Antibiotic Assaying by Use of a Direct Plate Technique. PHILIP M. TIerno, JR.....	325
Improved Agar Gradient-Plate Technique. D. E. HUNT AND H. J. SANDHAM.....	329
Antibiotic Additives for the Isolation of <i>Chondrococcus columnaris</i> from Fish. N. N. FUJAN.....	333

Clinical Microbiology, Virology, and Immunology

- Separation of the Proteolytic and Streptolytic Components of a *Streptomyces albus* Enzyme Preparation and Their Effect on Streptococcal Cells. JUANITA P. BRAY AND JOSEPH A. BASS. 232
- Arbovirus Plaquing in a Clonal Line (PS Y-15) of Porcine Kidney. THOMAS B. STIM AND JACK R. HENDERSON. 246
- Intraperitoneal Injection of Mice. NORMAN A. MINER, JACQUELINE KOEHLER, AND LAURA GREENAWAY. 250
- Survival of T3 Coliphage in Varied Extracellular Environments. I. Viability of the Coliphage During Storage and in Aerosols. JAMES C. WARREN AND MELVIN T. HATCH. 256
- Factors Affecting the Persistence of *Staphylococcus aureus* on Fabrics. LEE J. WILKOFF, LOUISE WESTBROOK, AND GLEN J. DIXON. 262
- Antibody Response of Animals to *Mycoplasma pneumoniae* Measured by Latex Agglutination. MEIR KENDE. 275
- Vacuum-cleaning System for Isolation Chambers. CHARLES E. YALE. 291
- Pyocine Typing of Clinical Strains of *Pseudomonas aeruginosa*. RONALD J. ZABRANSKY AND FRED E. DAY. 293
- Inhibitory Effect of Neutral Red on Bovine Virus Diarrhea-mucosal Disease Plaque Formation. K. V. SINGH. 323
- Identification of Nonfermenting Gram-negative Bacilli in the Clinical Laboratory. RONALD J. ZABRANSKY AND FRED E. DAY. 331
- Room Temperature Storage of *Treponema pallidum* on Microscope Slides for Use in the FTA-ABS Test. RONALD M. WOOD, ROSIE J. JUE, AND EDITH M. COFFEY. . . . 335

Food and Deterioration

- Direct Bacterial Count as a Rapid Freshness Test for Fish Fillets. PETER LERKE AND LIONEL FARBER. 197
- Effects of Polyurethane Foams on Microbial Growth in Fuel-Water Systems. J. J. COONEY. 227
- Growth Stimulation of *Lactobacillus* Species by Lactic Streptococci. A. L. BRANEN AND T. W. KEENAN. 280
- Sporulation, Heat Resistance, and Biological Properties of *Clostridium perfringens*. S. NISHIDA, N. SEO, AND M. NAKAGAWA. 303
- Packaging Method for Preserving Agar Plates During Prolonged Incubation. JOHN H. GREEN AND SOFIAN ILJAS. 322

Ecology and Taxonomy

- Predominant Catalase-negative Soil Bacteria. I. Streptococcal Population Indigenous to Soil. WILLIAM E. GLEDHILL AND L. E. CASIDA, JR. 208
- Estimating the Size and Concentration of Unicellular Microorganisms by Light Scattering. EDWARD L. MEREK. 219
- Marine Microorganisms Associated with the Food of Young Salmon. HUMITAKE SEKI. 252
- Characterization of Bacteria by Gas Chromatography: Comparison of Trimethylsilyl Derivatives of Whole-Cell Hydrolysates. DAVOOD FARSHTEHI AND C. WAYNE MOSS. 262
- Microbial Sulfate Reduction and Its Potential Utility as an Acid Mine Water Pol-

lution Abatement Procedure. JON H. TUTTLE, PATRICK R. DUGAN, AND CHESTER I. RANGLES	297
Improved Technique for Isolation and Identification of <i>Sphaerotilus</i> . EDWARD H. ARMBRUSTER	320

Metabolism and Products

Patulin Production by <i>Penicillium urticae</i> Bainier in Batch Culture. FRED A. NORSTADT AND T. M. MCCALLA	193
Cation-dependent Flocculation in a <i>Flavobacterium</i> Species Predominant in Activated Sludge. YASUHIKO TEZUKA	222
Microbiological Metabolism of Naphthyridines. P. B. HAMILTON, D. ROSI, G. P. PERUZZOTTI, AND E. D. NIELSON	237
Surfactants as Stimulants of Enzyme Production by Microorganisms. E. T. REESE AND ANNE MAGUIRE	242
Effect of Shaking Speed and Type of Closure on Shake Flask Cultures. L. E. MCDANIEL AND E. G. BAILEY	286
Effect of pH on Growth and Survival of Three Avian and One Saprophytic <i>Mycoplasma</i> Species. A. J. DAMASSA AND H. E. ADLER	310
Technique for the Aseptic Addition of Liquid to Flask Cultures. J. W. SMITH AND P. B. HAMILTON	317
Improved Growth of Mammalian and Insect Cells in Media Containing Increased Levels of Choline. STANLEY C. NAGLE, JR.	318
Cell Control Device for Continuous Culture Reactors. HOWARD ALMGREN	327

No. 3, MARCH 1969

Antimicrobial Agents and Chemotherapy

Some Active Derivatives of Penicillin. LOMAN D. BROWN, WALTER A. ZYGMUNT, AND HOMER R. STAVELY	339
Antagonistic Effect of Fatty Acids Against <i>Salmonella</i> in Meat and Bone Meal. MAHMOOD KHAN AND MICHAEL KATAMAY	402
Potential Use of Surface-active Agents for Controlling <i>Mycoplasma</i> Contamination in Animal Cell Cultures. ROBERTA K. REYNOLDS AND FRANK M. HETRICK	405
Hemodialysis Properties of Clindamycin (7-Chloro-7-Deoxylincomycin). JAMES E. CIMINO AND PHILIP M. TIerno, JR.	446
In Vitro Antimicrobial Activity and Human Pharmacology of Cephalexin, a New Orally Absorbed Cephalosporin C Antibiotic. THOMAS S. THORNHILL, MATTHEW E. LEVISON, WARREN D. JOHNSON, AND DONALD KAYE	457
Modified Sabouraud Medium Containing Neomycin and Polymyxin. STEPHEN N. COHEN	486

Clinical Microbiology, Virology, and Immunology

Elimination of Salmonellae from Animal Glandular Products. CONRAD W. DE FIEBRE, KENNETH T. BURCK, AND DAVID FELDMAN	344
Effect of Vaccine, Route, and Schedule on Antibody Response of Rabbits to <i>Pasteurella tularensis</i> . JOHN E. NUTTER	355
Effects of Tween 80 and Freon 113 on Measles Virus. WOLF PARISIUS AND HILDA G. MACMORINE	379
Rapid Identification of Viruses by Indirect Immunofluorescence: Standardization and Use of Antiserum Pool to Nine Respiratory Viruses. T. D. STEVENS AND H. M. S. WATKINS	384
Role of the Kidney in Staphylococcal Enterotoxemia. EDWARD V. STAAB, JOHN	

NIEDERHUBER, DAVID A. RHODA, CHARLES S. FAULKNER II, AND WILLIAM R. BEISEL.....	394
Significance of Hemolytic Colonies in Throat Cultures. ROBERT W. QUINN AND P. NYE LOWRY.....	412
Use of Erythrocytes Sensitized with Purified Pneumococcal Polysaccharides for the Assay of Antibody and Antibody-producing Cells. PHILLIP J. BAKER, PHILIP W. STASHAK, AND BENJAMIN PRESCOTT.....	422
Interacting Factors that Influence Long-term Storage of Live <i>Pasteurella tularensis</i> Vaccine and Rift Valley Fever Virus. FREDERICK KLEIN, JERRY S. WALKER, BILL G. MAHLANDT, RICHARD C. CARTER, MICHAEL D. ORLANDO, FRANCIS J. WEIRETHER, AND RALPH E. LINCOLN.....	427
Immunogenicity of Nanogram to Milligram Quantities of Inactivated Foot-and-Mouth Disease Virus. I. Relative Virus-neutralizing Potency of Guinea Pig Sera. D. O. MORGAN, H. L. BACHRACH, AND P. D. MCKERCHER.....	441
Delay of Poliovirus Plaque Formation with Use of Fresh Bovine Serum in the Growth Medium of Host Cells. CHRISTINE E. SMULL AND E. H. LUDWIG.....	449
Immunofluorescence Identification of <i>Thermopolyspora polyspora</i> , the Causative Agent of Farmer's Lung. ROBERT L. GRAY, FREDERICK J. WENZEL, AND DEAN A. EMANUEL.....	454
Homologous Interference by an Actively Multiplying Noncytopathic Strain of Bovine Virus Diarrhea-Mucosal Virus. K. V. SINGH.....	476
Simple Medium for Pigment Production by the Erythrasma Diptheroid. STEPHEN N. COHEN AND DOROTHY NICKOLAI.....	479
Acetamide Agar Medium Selective for <i>Pseudomonas aeruginosa</i> . MARY HEDBERG.....	481
Preservation of Primary Bovine Embryonic Kidney Cells with Dimethyl Sulfoxide. NORMA J. LINDSEY AND T. L. CHOW.....	484
Foot-and-Mouth Disease Virus: Stability of Neutralizing Antibody after Freeze-drying and Air-drying. O. N. FELLOWES.....	488

Food and Deterioration

Fluorescent-Antibody Technique in Detection of Salmonellae in Animal Feed and Feed Ingredients. C. R. LARAMORE AND C. W. MORITZ.....	352
--	-----

Ecology and Taxonomy

Fungi Isolated from Flue-cured Tobacco at Time of Sale and after Storage. R. E. WELTY AND G. B. LUCAS.....	360
Membrane Filter-Fluorescent-Antibody Method for Detection and Enumeration of Bacteria in Water. RUFUS K. GUTHRIE AND DENNIS J. REEDER.....	399
<i>Pseudomonas aeruginosa</i> for the Evaluation of Swimming Pool Chlorination and Algicides. G. P. FITZGERALD AND M. E. DERVARTANIAN.....	415
Heat-induced Macroconidia Germination in <i>Microsporium gypseum</i> . T. J. LEIGHTON AND J. J. STOCK.....	473
Fluorescence Staining for the Determination of Cell Viability. R. K. GRAHAM AND P. CAIGER.....	489

Metabolism and Products

Production of Alcohol Oxidase by Several Basidiomycetes. RICHARD M. KERWIN AND HANS W. RUELIUS.....	347
Production of Thermostable Alkaline Proteases by Thermophilic <i>Streptomyces</i> . KIYOSHI MIZUSAWA, EIJI ICHISHIMA, AND FUMIHIKO YOSHIDA.....	366
Mechanism and Factors Influencing the Veronal Inhibition of Bacterial Spore Germination. GONZALO SIERRA AND AINA BOWMAN.....	372
Influence of pH and Metal Cations on Aggregative Growth of Non-Slime-forming Strains of <i>Zoogloea ramigera</i> . DONALD I. ANGELBECK AND EDWIN J. KIRSCH.....	435
Disintegration of Microorganisms and Preparation of Yeast Walls in a New Type of Disintegrator. J. ŘEHÁČEK, K. BERAN, AND V. BIČÍK.....	462

- Density-Gradient and Chromatographic Fractionation of Leptospiral Lipase. ROBERT N. BERG, STANLEY S. GREEN, HERBERT S. GOLDBERG, AND DONALD C. BLENDEN... 467
- Biosynthesis of the Fungal Estrogen F-2 and a Naturally Occurring Derivative (F-3) by *Fusarium moniliforme*. C. J. MIROCHA, C. M. CHRISTENSEN, AND G. H. NELSON. 482

NO. 4, APRIL 1969

Antimicrobial Agents and Chemotherapy

- Bioassay for Hamycin and Amphotericin B in Serum and Other Biological Fluids. SMITH SHADOMY, JUDITH A. MCCAY, AND STEPHEN I. SCHWARTZ. 497

Clinical Microbiology, Virology, and Immunology

- Purification and Concentration of Influenza Types A and B by Chromatography on Calcium Phosphate. M. LAPIDUS. 504
- Immunofluorescent Identification of *Salmonella typhi* During a Typhoid Outbreak. MARJORIE L. BISSETT, CATHERINE POWERS, AND RONALD M. WOOD. 507
- Cell Dispersal Methods for Increasing Yield from Animal Tissues. HERBERT KAMMER. 524
- Standardized Procedure for Determination of Staphylocoagulase. Z. WĘGRZYNO-WICZ, J. JEJASZEWICZ, AND B. LIPINSKI. 556
- Direct Cord Reading Agar in Routine Mycobacteriology. VICTOR LORIAN. 559
- Factors Affecting the Passive Hemagglutination Titrations: Dilution Loops, Titration Trays, Vibration, Diluents. ARTHUR A. HIRATA, DENNIS S. GRANT, AND LAURENCE R. DRAPER. 563
- Isolation of Anaerobic Bacteria from Human Gingiva and Mouse Cecum by Means of a Simplified Glove Box Procedure. ALEXANDER ARANKI, SALAM A. SYED, ERNEST B. KENNEY, AND ROLF FRETER. 568
- Study of Delayed Hypersensitivity to Myxoviruses Induced by Vaccines. LAWRENCE P. TREMONTI AND GEORGE GEE JACKSON. 577
- Markers Differentiating Type 3 Parainfluenza Virus Grown at 25 and 37 C. PAUL H. FRICKEY. 589
- Fecal Microflora in Healthy Persons in a Preindustrial Region. LEONARDO J. MATA, CELINA CARRILLO, AND ELBA VILLATORO. 596
- Two-Dimensional Immuno-osmophoresis of Adenovirus Type 7 Antigens. S. K. VERNON AND B. A. RUBIN. 603
- Microneutralization Test for Determination of Rhinovirus and Coxsackievirus A Antibody in Human Diploid Cells. ROBERT L. KRIEL, HERTA WULFF, AND TOM D. Y. CHIN. 611
- Minicultures of Mammalian Cells in a New Plastic Plate. DAVID A. FUCCILLO, LOUIS W. CATALANO, JR., FLORA L. MODER, DAVID A. DEBUS, AND JOHN L. SEVER. 619
- Infectious Pancreatic Necrosis Virus: Lyophilization and Subsequent Stability in Storage at 4 C. KEN WOLF, M. C. QUIMBY, AND C. P. CARLSON. 623
- Evaluation of Plating Media for the Determination of Viable Microorganisms in Dental Plaque. D. E. HUNT, H. J. SANDHAM, AND R. W. GILMORE. 625
- Identification of Group A Streptococci by Direct Fluorometry. MAX D. MOODY AND C. DOUGLAS WEBB, JR. 627
- Thermostability of Rubella Hemagglutination-inhibiting Antibody. C. A. PHILLIPS AND L. O'BRIEN. 634
- Concentration and Purification of Herpesviruses (Simplex, Cytomegalo, and EB) in a Zonal Ultracentrifuge. ROBERT M. MCCOMBS. 636
- Glutaraldehyde Inactivation of Viruses in Tissue. FRED L. SABEL, ALFRED HELLMAN, AND JOSEPH J. MCDADE. 645
- Interaction Between Red Cell Stroma and Streptolysin O Inhibition of Cytotoxic Activity. P. MASTROENI, A. MISEFARI, AND A. NACCI. 650

Food and Deterioration

- Heat Resistance of *Salmonella* in Various Egg Products. J. A. GARIBALDI, R. P. STRAKA, AND K. IICHI. 491
- Interaction of Salt, pH, and Temperature on the Growth and Survival of *Salmonellae* in Ground Pork. JOHN A. ALFORD AND SAMUEL A. PALUMBO. 528
- Accelerated Procedure for *Salmonella* Detection in Dried Foods and Feeds Involving Only Broth Cultures and Serological Reactions. W. H. SPERBER AND R. H. DEIBEL. 533
- Comparison of Two Procedures for Detection of *Salmonella* in Food, Feed, and Pharmaceutical Products. L. D. FANTASIA, W. H. SPERBER, AND R. H. DEIBEL. 540
- Incidence Study of Spores of *Clostridium botulinum* in Convenience Foods. N. F. INSALATA, S. J. WITZEMAN, G. J. FREDERICKS, AND F. C. A. SUNGA. 542

Ecology and Taxonomy

- Populations of Dalapon-decomposing Bacteria in Soil as Influenced by Additions of Dalapon or Other Carbon Sources. WYLIE D. BURGE. 545
- Cometabolism and Gas Chromatography for the Sensitive Detection of Bacteria. B. M. MITRUKA AND M. ALEXANDER. 551
- Motility Tracks: Technique for Quantitative Study of Bacterial Movement. Z. VAITUZIS AND R. N. DOETSCH. 584
- Paraformaldehyde for Surface Sterilization and Detoxification. LARRY A. TAYLOR, MANUEL S. BARBEITO, AND GARDNER G. GREMILLION. 614
- Isolation of *Staphylococcus epidermidis* from Tobacco. JEROME J. PERRY. 647

Metabolism and Products

- Microbial Hydrocarbon Co-oxidation. II. Use of Ion-Exchange Resins. R. L. RAYMOND, V. W. JAMISON, AND J. O. HUDSON. 512
- Biological Activity of Aflatoxin B_{2a}. E. B. LILLEHOJ AND A. CIEGLER. 516
- Biosynthesis of Pyocyanine by a Paraffin Hydrocarbon-oxidizing Strain of *Pseudomonas aeruginosa*. E. G.-H. LEE AND C. C. WALDEN. 520
- Lipase of *Mucor pusillus*. G. A. SOMKUTI, F. J. BABEL, AND A. C. SOMKUTI. 606
- Apparatus for Preparation of Bacterial Extracellular Enzymes. SEYMON N. MILLNER. 639
- Cell Volume Determinations of *Dictyostelium discoideum*. JOHN BARRAVECCHIO, PAUL BAUMANN, AND BARBARA WRIGHT. 641
- Hydrolysis of Phenoxymethyl Penicillin into 6-Aminopenicillanic Acid with Spores of *Fusaria*. KARTAR SINGH, S. N. SEHGAL, AND CLAUDE VÉZINA. 643
- Production of Vitamin B₁₂ by *Micromonospora*. G. H. WAGMAN, R. D. GANNON, AND M. J. WEINSTEIN. 648

NO. 5, MAY 1969

Antimicrobial Agents and Chemotherapy

- Microbiological and Pharmacological Behavior of 7-Chlorolincomycin. BURT R. MEYERS, KENNETH KAPLAN, AND LOUIS WEINSTEIN. 653
- Systemic Antifungal Activity of Pyrrolnitrin. ROBERT S. GORDEE AND THOMAS R. MATTHEWS. 690
- Transferable Drug Resistance Among *Enterobacteriaceae* Isolated from Human Urinary Tract Infections. DONNA G. SIECKMANN, NORMAN D. REED, AND CARL E. GEORGI. 701
- Tube Dilution Antimicrobial Susceptibility Testing: Efficacy of a Microtechnique Applicable to Diagnostic Laboratories. LAWRENCE A. CHITWOOD. 707
- Suppressive Activity of Streptomycin on the Growth of *Mycobacterium lepraemurium* in Macrophage Cultures. Y. T. CHANG. 750
- Lomofungin, a New Antibiotic Produced by *Streptomyces lomondensis* sp. n. LE ROY E. JOHNSON AND ALMA DIETZ. 755
- Separation and Quantitation of Neomycins as Free Base by Paper Chromatography. MRINAL K. MAJUMDAR AND S. K. MAJUMDAR. 763

- Chemotherapeutic Activity of 5-Fluorocytosine Against a Lethal *Candida albicans* Infection in Mice. ROBERT F. PITILLO AND BRENDA J. RAY..... 773

Clinical Microbiology, Virology, and Immunology

- Evaluation of Factors Related to Growth of Rift Valley Fever Virus in Suspended Cell Cultures. JERRY S. WALKER, RICHARD C. CARTER, FREDERICK KLEIN, SHIRLEY E. SNOWDEN, AND RALPH E. LINCOLN..... 658
- Statistical Approach to Evaluating the Method of Morgan and Vryonis for Enumerating *Treponema pallidum*. CHARLES W. ARTLEY AND JOHN W. CLARK, JR..... 665
- Detection of Group A Streptococci in Throat Swabs by Direct Fluorometry. C. DOUGLAS WEBB, JR., AND MAX D. MOODY..... 682
- Bacteriophage Typing as an Epidemiological Tool for Urinary *Escherichia coli*. JOSEPH T. PARISI, JAMES C. RUSSELL, AND ROBERT J. MERLO..... 721
- Automated Technique for the Detection of Hemagglutinins to Sheep Erythrocytes. ROY CLEELAND AND E. GRUNBERG..... 726
- Ultraviolet Red Fluorescence of *Bacteroides melaninogenicus*. M. BERT MYERS, GEORGE CHERRY, BETTE B. BORNSIDE, AND GEORGE H. BORNSIDE..... 760
- Production of Antibody Against Conjugated Dipicolinic Acid (2,6 Pyridine Dicarboxylic Acid). DONALD T. DISQUE AND WILLIAM F. VINCENT..... 771
- Intracellular Survival of Viral and Rickettsial Agents in Acetone at -60 C. NICHOLAS HAHON AND W. DOUGLAS ZIMMERMAN..... 775

Food and Deterioration

- Experimental Transmission of *Enterobacteriaceae* by Insects. I. Fate of *Salmonella* Fed to the Hide Beetle *Dermestes maculatus* and a Novel Method for Mounting Insects. R. M. JULSETH, JACOB K. FELIX, WENDELL E. BURKHOLDER, AND R. H. DEIBEL.... 710
- Survival of Lyophilized *Bacillus popilliae* in Soil. A. J. LINGG AND K. J. MCMAHON... 718
- Influence of Pasteurization and Lye Treatment on the Fermentation of Spanish-Style Manzanilla Olives. JOSE M^a RODRÍGUEZ DE LA BORBOLLA Y ALCALÁ, MATÍAS J. FERNÁNDEZ-DÍEZ, AND FERNANDO GONZÁLEZ-CANCHO..... 734
- Ochratoxin A: Occurrence as Natural Contaminant of a Corn Sample. ODETTE L. SHOTWELL, C. W. HESSELTINE, AND MARION L. GOULDEN..... 765
- Effect of Temperature on Growth of *Salmonella* in Rehydrated Skim Milk from a Food-poisoning Outbreak. R. M. JULSETH AND R. H. DEIBEL..... 767

Ecology and Taxonomy

- Portable Ethylene Oxide Sterilization Chamber. J. R. SONGER AND R. G. MATHIS.... 671
- Enhanced Recovery of Airborne T₃ Coliphage and *Pasteurella pestis* Bacteriophage by Means of a Presampling Humidification Technique. M. T. HATCH AND J. C. WARREN..... 685
- Effect of Chloral Hydrate on Methane and Propionic Acid in the Rumen. C. J. VAN NEVEL, H. K. HENDRICKX, D. I. DEMEYER, AND J. MARTIN..... 695
- Growth Factor Requirements of *Ruminococcus flavefaciens* Isolated from the Rumen of Cattle Fed Purified Diets. L. L. SLYTER AND J. M. WEAVER..... 737
- Selective Medium for Growth of *Rhizobium*. P. H. GRAHAM..... 769

Metabolism and Products

- Role of Alcoholic Intermediates in Formation of Isomeric Ketones from *n*-Hexadecane by a Soil *Arthrobacter*. D. A. KLEIN AND F. A. HENNING..... 676
- Microbiological Hydroxylation of Cinerone to Cinerolone. B. TABENKIN, R. A. LE-MAHEU, J. BERGER, AND R. W. KIERSTEAD..... 714
- Production of Ochratoxin A by *Aspergillus ochraceus* in a Semisynthetic Medium. N. D. DAVIS, J. W. SEARCY, AND U. L. DIENER..... 742
- Chemical States of Bacterial Spores: Dry-Heat Resistance. GORDON ALDERTON AND NEVA SNELL..... 745
- Modifications in a French Pressure Cell-Laboratory Press System. D. N. MARDON AND E. BALISH..... 777

No. 6, JUNE 1969

Antimicrobial Agents and Chemotherapy

Effect of β -Lactamase Location in <i>Escherichia coli</i> on Penicillin Synergy. HAROLD C. NEU.....	783
Antiviral and Antitumor Antibiotics. XIV. Effects of Ascochlorin and Other Respiration Inhibitors on Multiplication of Newcastle Disease Virus in Cultured Cells. AKIRA TAKATSUKI, GAKUZO TAMURA, AND KEI ARIMA.....	825
Combined Effects of Diphenyliodonium Chloride, Pine Oils, and Mustard Oil Soaps on Certain Microorganisms. ZAHIR AHMED, MAHMOOD A. SIDDIQUI, AND ISMAT KHAN.....	857
Antimycobacterial Activity of Rifampin Under In Vitro and Simulated In Vivo Conditions. K. D. STOTTMEIER, G. P. KUBICA, AND C. L. WOODLEY.....	861
Antipseudomonal Activity of α -Sulfoaminopenicillins. K. E. PRICE, D. R. CHISHOLM, F. LEITNER, M. MISIEK, AND A. GOUREVITCH.....	881
Combined Action of Carbenicillin and Gentamicin on <i>Pseudomonas aeruginosa</i> In Vitro. MINETTA SONNE AND ERNEST JAWETZ.....	893
Induction of Spheroplasts of <i>Pseudomonas aeruginosa</i> by Carbenicillin. CHATRCHAI WATANAKUNAKORN AND MORTON HAMBURGER.....	935

Clinical Microbiology, Virology, and Immunology

Procedure for the Evaluation of the Virucidal Effectiveness of an Ethylene Oxide Gas Sterilizer. ROBERT W. SIDWELL, GLEN J. DIXON, LOUISE WESTBROOK, AND ELIZABETH A. DULMADGE.....	790
Propagation of MM Virus in L Cells. D. J. GIRON AND F. F. PINDAK.....	811
Propagation of MM Virus in Continuous Cell Lines. FRANK F. PINDAK AND JEROME P. SCHMIDT.....	815
Stabilities of Dried Suspensions of Influenza Virus Sealed in a Vacuum or Under Different Gases. DONALD GREIFF AND WILTON A. RIGHTSEL.....	830
Inactivation of the Bactericidal Activity of Human Serum by Liquoid (Sodium Polyanetholsulfonate). BETTY L. LOWRANCE AND WALTER H. TRAUB.....	839
Biochemical and Clinical Characteristics and Antibiotic Susceptibility of Atypical <i>Enterobacter cloacae</i> . JOHN A. WASHINGTON, II, PAULINE YU, AND WILLIAM J. MARTIN.....	843
Yellow Fever Vaccine. II. Antigenicity and Neurovirulence of a Vaccine Seed Free from Avian Leukosis Virus. NICOLA M. TAURASO, SHELDON L. SPECTOR, RUTH L. KIRSCHSTEIN, EDWARD B. SELIGMANN, JR., AND JANE F. FARBER.....	866
In Vitro Studies with 5-Fluorocytosine. SMITH SHADOMY.....	871
Effect of Incubation Temperature on T-Agglutination Typing of <i>Streptococcus pyogenes</i> . JOSEPH F. PADULA, RICHARD R. FACKLAM, AND MAX D. MOODY.....	878
T Antigens of Bovine and Canine Adenoviruses Demonstrated by Immunofluorescence. JEROME KERN, RAYMOND V. GILDEN, AND ROBERT J. HUEBNER.....	914
Simple Method for Anesthetizing Small Animals for Intranasal Inoculations. FRANK F. PINDAK AND JERRY Z. KENDRICK.....	920
Evaluation of Two Spot-Indole Test Reagents. B. L. LOWRANCE, P. REICH, AND W. H. TRAUB.....	923
Group B Streptococci in Neonatal Deaths. JOHN F. MACKNIGHT, PATRICIA J. ELLIS, KAREN A. JENSEN, AND BARBARA FRANZ.....	926
Use of Hamsters for Potency Assay of Eastern and Western Equine Encephalitis Vaccines. FRANCIS E. COLE, JR. AND ROBERT W. MCKINNEY.....	927
Methods for Storing Oxidase Test Reagents. A. L. BARRY AND K. L. BERNSOHN.....	933
Effect of Pertussis Vaccination on the Sensitivity of Mice to Insulin, Bicarbonate, and CO ₂ . A. G. LANE.....	938
Use of a Rapid Fluorescent-Antibody Staining Technique with Group A Streptococci. PAT W. FREEBURG.....	940

Food and Deterioration

Extracellular Nuclease Activity of Fish Spoilage Bacteria, Fish Pathogens, and Related Species. A. Y. SADOVSKI AND R. E. LEVIN.....	787
Biological Response of Lactic Streptococci and Lactobacilli to Catalase. S. E. GILLILAND AND M. L. SPECK.....	797
Preparation of Concentrated Lactic Streptococcus Starters. M. M. PEEBLES, S. E. GILLILAND, AND M. L. SPECK.....	805
Coagulase Production by Injured <i>Staphylococcus aureus</i> MF-31 During Recovery. M. W. PARIZA AND J. J. IANDOLO.....	836
Evaluation of a Washing Procedure in the Examination of Almonds for <i>Escherichia coli</i> . DANIEL KOKAL.....	897
Incidence of Salmonellae in Meat and Meat Products. M. A. WEISSMAN AND J. A. CARPENTER.....	899
Death of <i>Salmonella typhimurium</i> and <i>Escherichia coli</i> in the Presence of Freshly Reconstituted Dehydrated Garlic and Onion. MICHAEL G. JOHNSON AND REESE H. VAUGHN.....	903
Effect of Meat and Isolated Meat Proteins on the Thermal Inactivation of Staphylococcal Enterotoxin B. L. D. SATTERLEE AND A. A. KRAFT.....	906
Simple Method for the Separation of Ascospores. G. PARTSCH.....	925
Relationship Between Amino Sugars and Meat Microbial Quality. LEORA A. SHELEF AND JAMES M. JAY.....	931

Ecology and Taxonomy

Evaluation of a Method of Measuring Fermentation Rates and Net Growth of Rumen Microorganisms. MANAL ZAKI EL-DIN AND K. EL-SHAZLY.....	801
Rumen Microbial Ecology in Mule Deer. HENRY A. PEARSON.....	819
Two Additional <i>Salmonella</i> Serotypes: <i>Salmonella enteritidis</i> Ser 58:a- and <i>Salmonella enteritidis</i> Ser 44:z ₃₆ , z ₃₈ :- MARY M. BALL, WILLIAM J. MARTIN, RONALD M. WOOD, AND CATHERINE E. POWERS.....	921

Metabolism and Products

Ester Production by <i>Pseudomonas fragi</i> . II. Factors Influencing Ester Levels in Milk Cultures. M. C. REDDY, D. D. BILLS, AND R. C. LINDSAY.....	779
Growth and Pigmentation of <i>Epicoccum nigrum</i> in Submerged Culture. L. TUTTOBELLO, F. H. FOPPEN, AND A. CARILLI.....	847
Microbial Hydrocarbon Co-oxidation. III. Isolation and Characterization of an α,α' -Dimethyl- <i>cis,cis</i> -Muconic Acid-producing Strain of <i>Nocardia corallina</i> . V. W. JAMISON, R. L. RAYMOND, AND J. O. HUDSON.....	853
Cellulolysis by <i>Mucor pusillus</i> . G. A. SOMKUTI, F. J. BABEL, AND A. C. SOMKUTI.....	888
Production and Properties of α -L-Arabinofuranosidase from <i>Corticium rolsii</i> . AKIRA KAJI AND OSAMU YOSHIHARA.....	910
L-Asparaginase Production by Various Bacteria. R. E. PETERSON AND A. CIEGLER.....	929

SUBJECT INDEX

- Accelerated detection procedure—compared with traditional procedure, 540
—for *Salmonella*, 533, 540
—with broth cultures and serological reactions, 533
- Acetamide agar medium
—selective for *P. aeruginosa*, 481
- Acetone
—effect on viral and rickettsial agents, 775
- N*-acetyleneimine
—for inactivation of foot-and-mouth disease virus, 441
- Acid-fast bacilli
—staining, 182
- Acid-insoluble products
—monolayer cell cultures, 34
- Acid mine water
—activity of microorganisms, 297
- Acidified organic solvents
—for removal of salmonellae from glandular products, 344
- Acrylamide gel electrophoresis
—streptococcal cell walls, 31
- Activated sludge
—predominant bacterium, 222
- Adenovirus type 7 antigens
—two-dimensional immuno-osmophoresis, 603
- Aerobacter*
—multiple drug-resistant strains, 214
- Aflatoxin B₂
—biological activity, 516
- Aflatoxins
—assay for in corn samples, 765
- Agar media
—for determination of microorganisms in dental plaque, 625
- Agar plates
—packaging method for preservation, 322
- Air-drying
—for stabilizing foot-and-mouth disease antiserum, 488
- Airborne T3 coliphage
—enhanced recovery with presampling humidification technique, 685
- L-Alanine
—role in germination of *B. subtilis* spores, 372
- Alcohol oxidase
—effect of ferrous sulfate on production, 347
—production by basidiomycetes, 347
- Alcoholic intermediates
—role in formation of ketones from *n*-hexadecane, 676
- Alkali
—sensitivity of mice, 938
- Alkaline proteinase
—production by thermophilic *Streptomyces*, 366
- Allantoic fluid
—isolation of types A and B influenza, 504
- Almonds
—comparison of washing and direct inoculation, 897
—examined for *E. coli*, 897
- Ambient temperature
—for shipping serum rubella antibody, 634
- Amide penicillin derivatives
—activity against gram-positive organisms, 339
—activity against *S. aureus*, 339
—resistance to β -lactamase destruction, 339
—with penicillin G in competitive experiments, 339
- Amino sugars
—relation to meat microbial quality, 931
- 6-Aminopenicillanic acid
—produced from phenoxymethyl penicillin, 643
- Ammonia
—effect on bactericidal action of chlorine, 415
- Amphotericin B
—bioassay in serum and biological fluids, 497
—compared with 5-fluorocytosine, 773
- Anaerobes
—in fecal microflora of healthy persons, 596
- Anesthesia
—of small animals, 920
- Animal tissues
—methods for increasing cell yield, 524
- Anti-*Pasteurella tularensis* antibodies
—optimal procedures for production, 355
- Antibiotic assay
—direct plate technique, 325
- Antibiotics
—effect on bacteria from shrimp, 21
—in serum, 88
- Antibody and antibody-producing cells
—assayed with sensitized erythrocytes, 422
- Antibody response
—*M. pneumoniae*, 275
- Antifungal agent
—limited use of pyrrolnitrin, 690
- Antigenic composition
—of two *Salmonella* serotypes, 921
- Antimycin A₂
—isolation, 102
—toxicological properties, 102
- Antitumor therapy
—use of L-asparaginase, 929
- Antiviral antibiotics
—activity on Newcastle disease virus, 825
- Aqueous systems
—transient electric arcs, 48, 54, 59
- Arabanase
—identified in *C. rolfsii*, 910
- α -L-Arabinofuranosidase
—produced by *C. rolfsii*, 910
—properties, 910
- Arbovirus plaquing
—on clonal line of porcine kidney, 246
- Arthrobacter* isolate
—ability to transform *n*-hexadecane to isomeric ketones, 676
- Ascochlorin
—antiviral activity of, 825
- Ascospores
—method for separation, 925

- L-Asparaginase
—production by various bacteria, 929
Aspergillus niger
—flax retting by, 7
Aspergillus ochraceus
—production of ochratoxin A, 742
Atypical *Enterobacter cloacae*
—antibiotic susceptibility, 843
—biochemical and clinical characteristics, 843
Atypical mycobacteria
—susceptibility to rifampin, 202
Avian leukosis virus-free seed lots
—antigenicity and neurovirulence, 866
—compared with contaminated seed lots, 866
—for yellow fever vaccine, 866
- Bacillus popilliae*
—to control Japanese beetle, 718
Bacillus stearothermophilus spores
—chemical treatment of, 745
—dry-heat resistance, 745
Bacillus subtilis
—spore germination inhibited by Veronal, 372
Bacillus subtilis spores
—exposed to ethylene oxide, 671
—sampling from surfaces, 164
Bacteria
—detection by cometabolism and gas chromatography, 551
Bacteria in water
—detection with membrane filter fluorescent-antibody method, 399
Bacterial extracellular enzymes
—apparatus for preparation, 639
Bacterial infection
—effect on serum enzymes, 145
Bacterial movement
—studied by use of motility tracks, 584
Bacterial spores
—manipulation between states sensitive and resistant to dry heat, 745
Bacteriophage typing
—for identification of urinary *E. coli*, 721
Bacteroides melaninogenicus
—ultraviolet red-fluorescence of, 760
Basidiomycetes
—enzyme production in submerged culture, 347
—production of alcohol oxidase, 347
Batch-culture method
—patulin production, 193
Beef carcasses
—incidence of salmonellae, 899
BHK cells
—for propagation of MM virus, 815
BHK-21 cells
—for adaptation of MM virus to growth in L cells, 811
Bile duct hyperplasia
—as a measure of aflatoxin toxicity, 516
Bioassay in biological fluids
—for hamycin and amphotericin B, 497
—with single cylinder-plate diffusion technique, 497
Biocides
—incorporated into polyurethane foams, 227
- Blood culture
—new medium, 68
Blood red cell stroma extract
—interaction with streptolysin O, 650
Bovine adenovirus
—T antigens of, 914
Bovine virus diarrhea-mucosal disease virus
—inhibition by neutral red, 323
—plaque size as a measure of inhibition, 476
—specificity of interference of cytopathic and noncytopathic strains, 476
Brevibacterium ammoniagenes mutant
—orotic acid overproduction, 188
BXIV rotor
—for concentration and purification of herpesviruses, 636
- Calcium phosphate
—for isolation of influenza types A and B, 504
Candida albicans
—effect of 5-fluorocytosine, 773, 871
—system for obtaining enzyme preparations, 777
Canine adenovirus
—T antigens of, 914
Canine herpesvirus
—growth in dog kidney cells, 179
Carbenicillin
—combined action with gentamicin, 893
—for induction of spheroplasts of *P. aeruginosa*, 935
Carbon sources
—effect on number of dalapon-decomposing bacteria, 545
Carboxypeptidase
—production by thermophilic *Streptomyces*, 366
Catalase
—biological response of lactic streptococci and lactobacilli, 797
Catalase-negative soil bacteria
—morphological changes during cultivation, 208
—occurrence in a variety of soils, 208
—taxonomic status, 208
Cattle
—fed purified diets, 737
—isolated soy protein as dietary nitrogen source, 737
—predominant cellulolytic bacteria, 737
—urea as dietary nitrogen source, 737
Cell dispersal methods
—for increasing yield from animal tissues, 524
Cell viability
—determined with fluorescence staining, 489
Cell volume determinations
—of *D. discoideum*, 641
Cell wall antigens
—optimal conditions for solubilization, 232
Cellulolysis
—by *M. pusillus*, 888
Cephalosporins
—susceptibility of atypical *E. cloacae*, 843
Cephalexin
—human pharmacology, 457
—in vitro antibacterial activity, 457
—serum and urine levels after oral dose, 457

- Characterization of bacteria
 —by comparison of trimethylsilyl derivatives, 262
 —use of gas-liquid chromatography, 262
- Cheddar cheese
 —predominance of lactobacilli during curing, 280
- Cheese production
 —*S. aureus*, 63
- Chloral hydrate
 —effect on methane and propionic acid in the rumen, 695
- Chlorella sorokiniana*
 —oxygen-tolerant strain, 135, 139
- Chlorine
 —synergism with organic mercury algicide, 415
- 7-Chlorolincomycin
 —microbiological behavior, 653
 —pharmacological behavior, 653
- Chlortetracycline
 —effect on bacteria from shrimp, 21
- Choline
 —effect on growth of mammalian and insect cells, 318
- Chondrococcus columnaris*
 —antibiotic additives for isolation from fish, 333
- Chromatographic separation
 —for characterization of leptospiral lipase, 467
- Chromium chloride
 —for sensitization of erythrocytes, 422
- Chromobacterium violaceum*
 —viability at low temperature, 169
- Cinrolone
 —produced by hydroxylation of cinerone, 714
- Cinerone
 —microbiological hydroxylation to cinerolone, 714
- Clinical source
 —effect on typability of group A streptococci, 878
- Clinimycin
 —hemodialysis properties, 446
- Clostridium botulinum* spores
 —incidence in convenience foods, 542
- Clostridium botulinum* type F
 —effect of ionizing radiation, 128
- Clostridium perfringens*
 —correlation between heat resistance and sporulation, 303
- CO₂
 —sensitivity of mice, 938
- Coagulase production
 —as a criterion of virulence of staphylococci, 836
 —by injured *S. aureus* MF-31 cells, 836
- Cold variant
 —differentiated from parent strain, 589
 —of type 3 parainfluenza virus, 589
- Columbia Blood Agar Base
 —in new medium, 68
- Cometabolism
 —used with gas chromatography, 551
- Contaminants
 —in viral stocks, 17
- Continuous cell lines
 —for propagation of MM virus, 815
- Continuous culture reactor
 —use with cell control device, 327
- Convenience foods
 —incidence of *C. botulinum* spores, 542
- Cording
 —for identification of *M. tuberculosis*, 559
- Corn
 —lactic acid fermentation, 186
- Corn sample
 —ochratoxin A as a natural contaminant, 765
- Corticium rolfsii*
 — α -L-arabinofuranosidase of, 910
- Corynebacterium minutissimum*
 —causative diptheroid of erythrasma, 479
- Coxsackievirus A antibody
 —determined in human diploid cells, 611
- Cryogenic storage
 —for maintenance of *P. tularensis* vaccine, 427
 —for maintenance of Rift Valley fever virus, 427
- Cryptococcus neoformans*
 —effect of 5-fluorocytosine, 871
- Cyanuric acid
 —effect on bactericidal action of chlorine, 415
- Dalapon-decomposing bacteria
 —populations in soil, 545
- Data processing system, 93
- Delayed hypersensitivity
 —induced by vaccines, 577
 —to myxoviruses, 577
- Density-gradient ultracentrifugation
 —for characterization of leptospiral lipase, 467
- Dental plaque
 —determination of viable microorganisms, 625
- Deoxyribonuclease production
 —for identification of *P. putrefaciens*, 787
- Dequalinium acetate
 —cytoplasmic penetration, 118
 —mode of action, 118
- Dermestes maculatus*
 —involvement in dissemination of *Salmonella*, 710
- Diagnostic laboratories
 —use of microtechnique for susceptibility testing, 707
- Dialysis tubing
 —for preparation of bacterial extracellular enzymes, 639
- Dictyostelium discoideum*
 —cell volume determinations of, 641
- Diethylaminoethyl dextran
 —effect on rhinovirus RNA infectivity, 190
- α - α' -Dimethyl-*cis-cis*-muconic acid
 —accumulated by a strain of *N. corallina*, 853
- Dimethyl sulfoxide
 —for preservation of primary bovine embryonic kidney cells, 484
- p*-Dimethylaminobenzaldehyde
 —use in two spot-indole tests, 923
- p*-Dimethylaminocinnamaldehyde
 —use in two-spot indole test, 923
- Diphenyliodonium chloride
 —effect on microorganisms combined with pine oils and mustard oil soaps, 857
- Dipicolinic acid
 —role as a specific haptenic determinant, 771
- Direct bacterial count
 —test for freshness of fish fillets, 197
- Direct Cord Reading Agar
 —compared with standard techniques, 559

- use in routine mycobacteriology, 559
- Direct fluorometry
 - compared with microscopic fluorescent-antibody test, 682
 - for detection of group A streptococci, 682
 - for identification of group A streptococci, 627
- Direct plate technique
 - use in antibiotic assay, 325
- Discharge liquid in aqueous systems
 - microbicidal effect, 59
- Disintegration of microorganisms
 - rate dependent on several factors, 462
 - with a new type of disintegrator, 462
- Dried foods and feeds
 - procedure for *Salmonella* detection, 533
- Drug-sensitive pathogens
 - as competent R-factor recipients, 701
- Dry-heat resistance
 - of chemical states of bacterial spores, 745
 - temperature dependence, 745
- Drying
 - by sublimation of ice in vacuo, 836
 - for preservation of biological materials, 836
- Eastern equine encephalitis vaccine
 - assayed in hamsters, 927
- Egg products
 - heat resistance of salmonellae, 491
- Eggs
 - Salmonella* contamination, 98
- Electric arcs in water
 - bactericidal effect, 48
 - microbicidal effect, 59
 - virucidal effect, 54
- Electronic equipment
 - sterilization with paraformaldehyde, 614
- Electrophoretic analysis
 - for characterization of leptospiral lipase, 467
- Embolectomy catheters
 - sterilized in an ethylene oxide sterilizer, 671
- Enterobacteriaceae*
 - atypical organisms resembling *E. cloacae*, 843
 - experimental transmission by insects, 710
 - isolated from human urinary tract infections, 701
 - transferable drug resistance among, 701
- Enzyme analysis
 - agar-gel electrophoretic, 183
 - slicing device, 183
- Enzyme production
 - stimulation by surfactants, 242
- Epicoccum nigrum*
 - growth and pigmentation in submerged culture, 847
- Erwinia aroideae*
 - producer of L-asparaginase, 929
- Erythrocytes
 - for assay of antibody and antibody-producing cells, 422
 - sensitized with purified pneumococcal polysaccharides, 422
- Erythromycin
 - serum levels, 88
- Escherichia coli*
 - dequalinium acetate, 118
 - effect of β -lactamase location on penicillin synergy, 783
 - exposed to human serum containing Liquoid, 839
 - inhibition by rumen fluid, 83
 - recovery from almonds, 897
 - susceptibility to garlic, 903
 - susceptibility to onion, 903
 - urinary strains identified by phage typing, 721
- Esters
 - factors influencing production by *P. fragi*, 779
- Estimation of particle numbers
 - by direct counting, 219
 - by light scattering, 219
- Ethylene oxide
 - use in a portable sterilization chamber, 671
- Ethylene oxide gas sterilizer
 - virucidal effectiveness, 790
- Ethylene oxide sterilization chamber
 - for sterilizing embolectomy catheters, 671
- Euglobulin
 - use in determination of staphylocoagulase, 556
- Extracellular nuclease activity
 - of fish spoilage bacteria, 787
- F-2
 - biosynthesis by *F. moniliforme*, 482
- F-3
 - biosynthesis by *F. moniliforme*, 482
- Fabrics
 - disseminators of *S. aureus*, 268
- Farmer's lung disease
 - caused by *T. polyspora*, 454
- Fatty acids
 - antagonistic effect on *Salmonella*, 402
 - effect determined by sensitivity and pour-plate techniques, 402
 - in rumen fluid, 83
 - inhibition of *E. coli*, 83
- Fecal microflora
 - in healthy persons, 596
- Feed
 - procedures for *Salmonella* detection, 540
- Fermentation
 - Philippine vegetable blends, 10
- Fermentation of corn
 - effect of soya flour, 186
- Fermentation rates
 - method for measurement in rumen microorganisms, 801
- Fermented foods
 - S. aureus*, 63
- Fish fillet freshness test
 - direct bacterial count method, 197
 - hypoxanthine estimation, 197
- Fish spoilage bacteria
 - extracellular nuclease activity, 787
- Flask cultures
 - aseptic addition of liquid, 317
- Flavobacterium* isolates
 - flocculation process, 222
 - metabolic activity, 222
 - taxonomical properties, 222

- Flax retting
—by *Aspergillus niger*, 7
- Floc formation in *Flavobacterium*
—cation dependence, 222
- Flue-cured tobacco
—effect of moisture on fungal growth, 360
—isolation of fungi at sale and after storage, 360
—role of moisture in deterioration, 360
- Fluorescence staining
—for determination of cell viability, 489
- Fluorescent-antibody technique
—compared with cultural method, 352
—for detection of *Salmonella* in animal feed, 352
- Fluorescent treponemal antibody absorption test
—with unfixed smears of *T. pallidum*, 335
- 5-Fluorocytosine
—activity against *C. albicans* infection, 773
—compared with amphotericin B, 773
—for treatment of human cryptococcosis, 871
—in vitro studies with, 871
- Food
—procedures for *Salmonella* detection, 540
- Foot-and-mouth disease virus
—stability of antiserum after air-drying, 488
—stability of antiserum after freeze-drying, 488
- Francisella tularensis*
—infection of white rats, 145
- Freeze-drying
—for stabilizing foot-and-mouth disease antiserum, 488
- Freezing
—for storing oxidase test reagents, 933
- French pressure cell-laboratory press system
—for obtaining enzyme preparations, 777
—modifications in, 777
- Freon 113
—effects on measles virus, 379
- Fresh bovine serum
—delay of poliovirus plaque formation, 449
- Friend virus
—immunological properties, 157
—mouse-spleen derived, 157
- Frozen foods
—bacterial identification, 26
- Fuel-utilizing organisms
—*Hormodendrum* sp., 227
—*P. aeruginosa*, 227
- Fungi
—differences between damaged and nondamaged tobacco, 360
—isolated from flue-cured tobacco, 360
- Fusaria spores
—for hydrolysis of phenoxymethyl penicillin, 643
- Fusarium moniliforme*
—biosynthesis of F-2 and F-3, 482
- Gamma irradiation
—effect on *Clostridium botulinum* type F, 128
- Garlic
—bactericidal effect, 903
- Gas chromatography
—for detection of low bacterial cell densities, 551
- Gas-liquid chromatography
—for characterization of bacteria, 262
- Gases
—for storage of dried influenza virus suspensions, 830
- Gauze-cotton pads
—effect on growth of *E. coli* in shake flasks, 286
- Gentamicin
—combined action with carbenicillin, 893
- Germination
—inhibited by Veronal, 372
- Glove box procedure
—compared with roll tube method, 568
—for isolation of anaerobic bacteria, 568
- Glutaraldehyde
—for inactivation of virus in tissue, 645
- Gradient plate technique
—trilevel, 329
- Gram-negative organisms
—effect of 7-chlorolincomycin, 653
- Gram-positive organisms
—effect of 7-chlorolincomycin, 653
- Ground pork
—growth and survival of salmonellae, 528
- Group A streptococci
—detected by direct fluorometry, 682
—identified by direct fluorometry, 627
—identified by rapid fluorescent-antibody technique, 940
- Group B streptococci
—in neonates, 926
- Guinea pigs
—compared with hamsters for assay of vaccines, 927
—for assay of Eastern and Western equine encephalitis vaccines, 927
—virus-neutralizing potency of sera, 441
- Halogenated organic acids
—for detection of bacteria by cometabolism, 551
- Hamsters
—compared with guinea pigs for vaccine assay, 927
—for assay of Eastern and Western equine encephalitis vaccines, 927
- Hamycin
—bioassay in serum and biological fluids, 497
- Healthy persons
—fecal microflora, 596
- Heat resistance
—of *Salmonella* in egg products, 491
—*S. senftenberg* 775W, 78
- Heat selection
—effect on biological properties of *C. perfringens*, 303
- Hemagglutinins
—automated technique for detection, 726
—to sheep erythrocytes, 726
- Hemodialysis
—effect on clinimycin blood levels, 446
- Hemolytic colonies
—significance in throat cultures, 412
- Herellae* (*Acinetobacter*)
—from frozen foods, 26
- Herpesvirus
—canine, 179

- Herpesviruses
—concentration and purification in a zonal ultracentrifuge, 636
- n*-Hexadecane
—transformation to isomeric ketones, 676
- Host-parasite system
—*M. lepraemurium* grown in macrophage cultures, 750
- Human gingiva
—isolation of anaerobic bacteria, 568
- Human serum
—inactivation of bactericidal activity by Liquoid, 839
- Human urinary tract infections
—isolation of *Enterobacteriaceae*, 701
- Hydrocarbon-oxidizing microorganisms
—production of pyocyanine, 520
- Hydrogen peroxide
—production by lactic streptococci and lactobacilli, 797
- Hydrogenomonas eutropha*
—protein quality, 176
- Hydrolytic enzymes
—in culture filtrates of *M. pusillus*, 888
- Hydroxylation at the 2-position
—effect on aflatoxin toxicity, 516
- Hypoxanthine estimation
—test for freshness of fish fillets, 197
- Immunofluorescence
—compared with conventional methods, 507
—for demonstration of T antigens, 914
—for identification of *S. typhi*, 507
—for identification of *T. polyspora*, 454
- Immunological precipitation system
—for evaluating role of spore dipicolinic acid, 771
- Inactivated foot-and-mouth disease virus
—immunogenicity of nanogram to milligram amounts, 441
- Incubation temperature
—effect on T-agglutination typing of *S. pyogenes*, 878
- Indirect fluorescent-antibody test
—for identification of respiratory viruses, 384
—used with pooled antisera, 384
- Indirect fluorometric technique
—as a basis for direct fluorometry, 627
- Infectious pancreatic necrosis virus
—lyophilization and storage at 4°C, 623
- Influenza types A and B
—purification by chromatography, 504
- Influenza virus
—inactivated by glutaraldehyde, 645
—stabilities of dried suspensions, 830
—storage under different gases, 830
- Infrared spectral analysis
—to determine purity of yeast cell walls, 462
- Insects
—novel method for mounting, 710
- Insulin
—sensitivity of mice, 938
- Intercellular water
—in pellets of *D. discoideum*, 641
- Intranasal inoculations
—of small animals, 920
- Intraperitoneal injection
—misplacement in mice, 250
—technical procedures, 250
- Ion-exchange resins
—effects on microbial hydrocarbon co-oxidation, 512
- Isolation chambers
—waste removal by a vacuum-cleaning system, 291
- Isomeric ketones
—formation by transformation of *n*-hexadecane, 676
- Isoniazid
—activity when combined with rifampin, 861
—antituberculous activity compared with rifampin, 861
- Jet fuel-water systems
—growth in, 227
- Kidney
—role in staphylococcal enterotoxemia, 394
- Klebsiella*
—multiple drug-resistant strains, 214
- L cells
—for propagation of MM virus, 811, 815
- β -Lactamase
—effect of location on penicillin synergy, 783
- Lactic streptococci
—biological response to catalase, 797
- Lactic streptococcus starters
—biological activity and storage stability, 805
—preparation of, 805
- Lactobacilli
—biological response to catalase, 797
- Lactobacillus plantarum*
—vegetable fermentation, 10
- Lactobacillus* species
—growth simulation by lactic streptococci, 280
- Lactose-fermenting species
—*Neisseria lactamica*, 71
- Latex agglutination
—comparison with complement fixation test, 275
—comparison with tetrazolium reduction inhibition, 275
—*M. pneumoniae* antibody titration, 275
- Leptospira*
—culture medium, 185
- Leptospiral lipase
—density-gradient and chromatographic fraction, 467
—esterase activity, 467
- Leuconostoc mesenteroides*
—vegetable fermentation, 10
- Light scattering
—measurement of cell size and numbers, 219
- Lipase of *Mucor pusillus*
—compared with other fungal lipases, 606
—properties, 606
- Liquoid
—for inactivation of bactericidal activity of human serum, 839
- Live *Pasteurella tularensis* vaccine
—factors influencing long-term storage, 427

- Lomofungin
—biological properties, 755
—characterized by paper chromatography, 755
—produced by *S. lomondensis* sp. n., 755
- Loops
—use in hemolysin titration, 563
- Lye treatment
—compared with heat treatment, 734
—effect on fermentation of Manzanilla olives, 734
- Lyophilization with additives
—effect on infectious pancreatic necrosis virus, 623
- Lyophilized *Bacillus popillae*
—survival in dry soil, 718
—survival in soils at various relative humidities, 718
- Lysostaphin in fermented foods
—*S. aureus* response, 63
- McCoy cells
—for propagation of MM virus, 815
- Macroconidia germination
—induced by heat in *M. gypseum*, 473
- Macrophage migration
—for study of delayed hypersensitivity, 577
- Mammalian and insect cells
—growth in media with increased choline levels, 318
- Mammalian cells
—miniculture in a plastic plate, 619
- Manzanilla olives
—effect of pasteurization and lye treatment, 734
—fermentation of, 734
- Marine microorganisms
—nutritional value for fish, 252
- Markers
—for type 3 parainfluenza virus grown at 25 and 37 C, 589
- Measles virus
—effects of Tween 80 and Freon 113, 379
- Meat and bone meal
—contaminated with *Salmonella*, 402
- Meat and meat products
—incidence of salmonellae, 899
- Meat microbial quality
—relation to amino sugars, 931
- Meat slurries
—effect on enterotoxin B during heating, 906
- Membrane filter fluorescent-antibody method
—compared with standard methods, 399
—for detection of bacteria in water, 399
- Metal cations
—effect on non-slime-forming strains of *Z. ramigera*, 435
- Methane production in the rumen
—effect of chloral hydrate, 695
- Methoxyflurane
—for anesthetizing small animals, 920
- Metmyoglobin
—effect on enterotoxin B during heating, 906
- Mice
—effect of pertussis vaccination, 938
—misplacement of intraperitoneal injection, 250
—sensitivity to insulin, bicarbonate, and CO₂, 938
- Microbial biomass in salmon digestive tract
—direct microscopic method, 252
—physiological method, 252
—plate count method, 252
- Microbial hydrocarbon co-oxidation
—effects of ion-exchange resins, 512
- Microbial net growth
—method for measurement in rumen microorganisms, 801
- Microbial sulfate reduction
—use as pollution abatement procedure, 297
- Microbiological hydroxylation
—of cinerone to cinerolone, 714
- Micromethod
—serum levels of erythromycin, 88
- Micromonospora*
—production of vitamin B₁₂, 648
- Microneutralization test
—for determining coxsackievirus A antibody, 611
—for determining rhinovirus antibody, 611
- Microorganisms in dental plaque
—determined on four agar media, 625
- Microscopic fluorescent-antibody test
—compared with direct fluorometry, 682
—for detection of group A streptococci, 682
- Microsporium gypseum*
—heat-induced macroconidia germination, 473
- Microtechnique
—compared with standard tube method, 707
—for determining antibiotic susceptibilities, 707
- Microtiter plates
—use in microneutralization test, 611
- Microwaves
—effect on *Saccharomyces cerevisiae*, 106
—effect on *Streptococcus faecalis*, 106
- Milk cultures
—for ester production by *P. fragi*, 779
- Miniculture technique
—with a new plastic micro plate, 619
- Mixed culture methane fermentation
—with continuous culture reactor, 327
- MM virus
—propagation in continuous cell lines, 815
—propagation in L cells, 811
- Modified Sabouraud medium
—containing neomycin and polymyxin, 486
—for isolation of fungi, 486
- Moisture content
—effect on flue-cured tobacco, 360
- Monolayer cell cultures
—acid-insoluble products, 34
- Monolayer systems
—compared with suspended cell cultures, 658
—for growth of Rift Valley fever virus, 658
- Morgan-Vryonis counting method
—for enumeration of *T. pallidum*, 665
—statistical analysis of, 665
- Most-probable-number method
—for counting dalapon-decomposing bacteria, 545
- Motility tracks
—for quantitative study of bacterial movement, 584
- Mounting method for insects
—for study of *Salmonella* in beetle gut, 710
- Mouse cecum
—isolation of anaerobic bacteria, 568
- Mouse peritoneal macrophages
—for growth of *M. lepraemurium*, 750
- Mucor pusillus*
—cellulolysis by, 888

- lipase of, 606
- multiple cellulolytic enzyme system of, 888
- Mueller-Hinton agar
- for isolation of erythrasma diptheroid, 479
- Mule deer
- rumen microbial ecology, 819
- Multiple drug resistance
- in *Klebsiella* and *Aerobacter*, 214
- R-factor mediated, 214
- transfer to *E. coli*, 214
- Mustard oil soaps
- effect on microorganisms combined with pine oils and diphenyliodonium chloride, 857
- Mycobacteria
- Direct Cord Reading Agar for identification, 559
- effect of rifampin, 861
- Mycobacterium lepraemurium*
- effect of streptomycin, 750
- growth in macrophage cultures, 750
- Mycobacterium tuberculosis*
- inhibition by rifampin, 202
- Mycoplasma*
- effect of pH on growth and survival, 310
- Mycoplasma* contamination
- control by surface-active agents, 405
- in animal cell cultures, 405
- Mycoplasma pneumoniae*
- antibody response of animals, 275
- Myosin
- effect on enterotoxin B during heating, 906
- Myxoviruses
- delayed hypersensitivity induced by vaccines, 577
- Nalidixic acid
- conversion to 7-hydroxymethyl derivative, 237
- metabolism by fungi, 237
- Naphthyridines
- microbiological metabolism, 237
- Neisseria gonorrhoeae*
- fluorescent-antibody staining, 14
- Neisseria lactamica* sp.n.
- comparison to *N. meningitidis*, 71
- Neisseria meningitidis*
- comparison to *N. lactamica* sp.n., 71
- Neomycin
- added to Sabouraud medium, 486
- for detection of *C. columnaris*, 333
- Neomycins
- separation and quantitation by paper chromatography, 763
- Neonatal deaths
- caused by group B streptococci, 926
- Nephrectomized animals
- effect of staphylococcal enterotoxin B, 394
- Neutral red
- effect on bovine virus diarrhea-mucosal disease virus, 323
- Newcastle disease virus
- antiviral activity of respiration inhibitors, 825
- Nitrofurans
- effect on bacteria from shrimp, 21
- Nocardia*
- products of *p*-xylene oxidation, 512
- Nocardia corallina* V-49
- accumulation of α - α' -dimethyl-*cis,cis*-muconic acid, 853
- two pathways for oxidation of *p*-xylene, 853
- Non-slime-forming strains of *Zoogloea ramigera*
- influence of pH and metal cations, 425
- Nonfermenting gram-negative organisms
- identification in clinical laboratory, 331
- Nonionic detergents
- for control of *Mycoplasma* in animal cell cultures, 405
- for elimination of *Mycoplasma* in virus stock, 405
- Ochratoxin A
- as a natural contaminant in a corn sample, 765
- produced by *A. ochraceus*, 742
- produced by *A. ochraceus* Wilk., 765
- production in semisynthetic medium, 742
- Ogi
- industrial production, 186
- Onion
- bactericidal effect, 903
- Orotic acid overproduction
- Brevibacterium ammoniagenes* mutant, 188
- Oxidase test reagents
- methods for storing, 933
- Oxygen pressure
- effect on growth of *Chlorella*, 135, 139
- Oxygen toxicity, 135, 139
- Packaging method
- for preservation of agar plates, 322
- Paecilomyces varioti*
- as an indicator organism, 497
- Pancreatin
- heat treatment to eliminate salmonellae, 344
- Paper chromatography
- for separation and quantitation of neomycins, 763
- Paraformaldehyde
- for surface sterilization, 614
- Passive hemagglutination titration
- effects of various factors, 563
- with stabilized erythrocytes, 563
- Pasteurella pestis* bacteriophage
- enhanced recovery with presampling humidification technique, 685
- Pasteurella tularensis* vaccines
- antibody response of rabbits, 355
- Pasteurization
- effect on fermentation of Manzanilla olives, 734
- Patulin
- production by *P. urticae*, 193
- purification on laboratory scale, 193
- Penicillin
- amide derivatives, 339
- Penicillin G hydroxamic acid
- method of synthesis, 339
- Penicillin synergy
- effect of β -lactamase location in *E. coli*, 783
- Penicillins
- a new antipseudomonal class, 881
- Penicillium adametzi*
- ability to convert nalidixic acid, 237
- Penicillium urticae* Bainer
- growth in batch culture, 193
- patulin production, 193

- Pertussis vaccination
—effect on sensitivity of mice, 938
- pH
—effect on growth and survival of *Mycoplasma*, 310
—effect on non-slime-forming strains of *Z. ramigera*, 435
—effect on salmonellae, 528
- pH control
—effect on growth of *S. cremoris*, 805
—with ammonium hydroxide as neutralizer, 805
—with sodium hydroxide as neutralizer, 805
- Pharmaceutical products
—procedures for *Salmonella* detection, 540
- Phenoxymethyl penicillin
—hydrolysis into 6-aminopenicillanic acid, 643
- Photon production in aqueous systems
—bactericidal effect, 48
- Pigment production
—by the erythrasma diptheroid, 479
—simple medium for detection, 479
- Pigments
—production by *E. nigrum*, 847
- Pine oils
—synergism with iodinium compounds, 857
- Plaque production
—in clonal line of porcine kidney, 246
- Plaque size
—for measuring inhibition of bovine virus diarrhea-mucosal virus, 476
- Plastic micro plate
—compared with standard tube methods, 619
—use in virological procedures, 619
- Poliovirus
—inactivation by UV radiation, 1
- Poliovirus inhibitor
—present in bovine serum, 449
- Poliovirus plaque formation
—delay with use of fresh bovine serum, 449
—in growth medium of host cells, 449
- Polymyxin
—added to Sabouraud medium, 486
- Polymyxin B
—for detection of *C. columnaris*, 333
- Polyurethane foams
—effect on microbial growth in fuel-water systems, 227
- Pork carcasses
—incidence of salmonellae, 899
- Preindustrial region
—fecal microflora of healthy persons, 596
- Premature infants
—infection with group B streptococci, 926
- Presampling humidification technique
—for enhanced recovery of *P. pestis* bacteriophage, 685
—for enhanced recovery of airborne T3 coliphage, 685
- Primary bovine embryonic kidney cells
—preservation with dimethyl sulfoxide, 484
- Primuline
—for differentiation between yeast cells, 489
- Propionic acid production in the rumen
—effect of chloral hydrate, 695
- Protein quality
—*Hydrogenomonas eutropha*, 176
- Proteolytic components
—*S. albus*, 232
- PS Y-15 clonal line
—arbovirus plaquing, 246
- Pseudomonas aeruginosa*
—combined action of carbenicillin and gentamicin, 893
—effect of α -sulfoaminopenicillins, 881
—for evaluation of swimming pool chlorination, 415
—high numbers associated with cyanuric acid, 415
—induction of spheroplasts by carbenicillin, 935
—isolation with acetamide agar medium, 481
—paraffin hydrocarbon-oxidizing strain, 520
—pyocine typing of clinical strains, 293
- Pseudomonas fragi*
—ester production by, 779
- Pseudomonas ovalis*
—from frozen foods, 26
- Pseudomonas putrefaciens*
—identification by deoxyribonuclease production, 787
- Purification of Friend virus
—gel filtration, 157
- Purified pneumococcal polysaccharides
—for sensitization of erythrocytes, 422
- Pyocine production
—for typing clinical strains of *P. aeruginosa*, 293
- Pyocyanine
—biosynthesis by a strain of *P. aeruginosa*, 520
- Pyrrolnitrin
—systemic antifungal activity, 690
- Rabbit dipicolinyl antibody
—use in immunological precipitation system, 771
- Rabbits
—antibody response to *P. tularensis* vaccines, 355
- Radioisotope assay
—virus-induced enzymes, 41
- Radiometric method
—monolayer culture study, 34
- Rapid fluorescent-antibody staining technique
—compared with conventional techniques, 14, 940
—for detection of enteropathogenic *E. coli*, 14
—for identifying group A streptococci, 14, 940
- Reagent-impregnated filter paper
—for storing oxidase test reagents, 933
- Record-keeping
—data processing system, 93
- Rehydrated skim milk
—growth of *Salmonella*, 767
- Relative humidity
—effect on airborne stability of T3 coliphage, 256
—effect on persistence of *S. aureus* on fabrics, 268
—effect on survival of lyophilized *B. popillae*, 718
- Respiration inhibitors
—activity on Newcastle disease virus, 825
- Respiratory viruses
—identified with indirect fluorescent-antibody test, 384
- Retting of flax
—by *Aspergillus niger*, 7
- Rhinovirus antibody
—determined in human diploid cells, 611

- Rhinovirus ribonucleic acid
—enhancement of infectivity, 190
- Rhizobium*
—isolation from soil, 769
—selective medium for growth, 769
- Rice cultures of *Aspergillus flavus*
—aseptic addition of liquid, 317
- Rickettsial agents
—survival in acetone at -60°C , 775
- Rifampin
—activity when combined with isoniazid, 861
—antimycobacterial activity, 861
—antituberculous activity compared with isoniazid, 861
—in vitro effect on mycobacteria, 202
—stability of aqueous solutions, 861
—use in treatment of tuberculosis, 202
- Rift Valley fever virus
—factors influencing long-term storage, 427
—growth in suspended cell cultures, 658
- Rothia dentocariosa*
—identification, 150
—in clinical materials, 150
- Rubella hemagglutination-inhibiting antibody
—thermostability, 634
- Rumen
—effect of chloral hydrate on methane and propionic acid, 695
- Rumen fluid
—*E. coli* inhibition, 83
—volatile fatty acids, 83
- Rumen microbial ecology
—of mule deer, 819
- Rumen microorganisms
—measurement of fermentation rates and growth, 801
- Rumen of cattle
—isolation of *R. flavefaciens*, 737
- Ruminococcus flavefaciens*
—growth factor requirements, 737
—isolated from rumen of cattle, 737
- Saccharomyces cerevisiae*
—effects of 2,450-megahertz microwaves, 106
- Salmon
—microorganisms associated with food, 252
- Salmonella*
—accelerated procedure for detection, 533
—antagonistic effect of fatty acids, 402
—contamination of eggs, 98
—dissemination by hide beetle, 710
—effect of temperature on growth in skim milk, 767
—heat resistance, 78
—heat resistance in egg products, 491
—in dried foods and feeds, 533
—in food, feed, and pharmaceutical products, 540
—species and serotypes, 111
—technique for detection in animal feed, 352
—two additional serotypes, 921
—two procedures for detection, 540
- Salmonella senftenberg* 775W
—heat resistance, 78
- Salmonella typhi*
—immunofluorescence for identification, 507
- Salmonella typhimurium*
—infection of white rats, 145
—susceptibility to garlic, 903
—susceptibility to onion, 903
- Salmonellae
—effect of salt, pH, and temperature, 528
—elimination from animal glandular products, 344
—in ground pork, 528
—incidence in meat and meat products, 899
- Salt
—effect on salmonellae, 528
- Sampling surfaces
—vacuum probe, 164
- Seawater
—poliovirus-contaminated, 1
- Seed lots
—for yellow fever vaccine, 866
- Semisynthetic medium
—for production of ochratoxin A, 742
- Serological grouping and typing
—of streptococci from throat cultures, 412
—use of single colony, 412
- Serum
—levels of cephalixin after oral dose, 457
- Serum-derivative medium
—for *Leptospira*, 185
- Serum enzymes
—indicators of infection, 145
- Shake flask cultures
—effect of shaking speed and type of closure, 286
- Shaking speed
—effect on candidin production by *S. viridoflavus*, 286
- Sheep erythrocytes
—detection of hemagglutinins to, 726
- Shrimp
—antibiotic preservatives, 21
- Siliconized slides
—staining bacilli, 182
- Sintered-glass plates
—for separation of ascospores, 925
- Skin testing
—for study of delayed hypersensitivity, 577
- Slicing device
—agar-gel electrophoretic analysis, 183
- Small animals
—simple method for anesthetizing, 920
- Solvent system
—for separation of similar antibiotics, 763
- Soya flour
—effect on fermentation of milled corn, 186
- Sphaerotilus*
—technique for isolation and identification,
- Spheroplasts
—induction with carbenicillin, 935
- Spleen homogenate
—Friend virus from, 157
- Spoilage of meats
—related to increase in hydration capacity, 931
- Spores
—counting procedure, 925
- Sporulation media
—for *C. perfringens*, 303
- Stabilized erythrocytes
—use in passive hemagglutination titration, 563

- Staining of acid-fast bacilli
—between silicone layers, 182
Standard aerosol sampler
—used with and without humidification device, 685
Staphylocoagulase
—procedure for determination, 556
Staphylococcal enterotoxin B
—effect of meat and meat proteins, 906
—effect on nephrectomized and sham-nephrectomized animals, 394
—possible protective role of the kidney, 394
—thermal inactivation, 906
Staphylococcus aureus
—dequalinium acetate, 118
—persistence on fabrics, 268
—response to lysostaphin, 63
Staphylococcus aureus MF-31
—coagulase production by injured cells, 836
Staphylococcus epidermidis
—isolated from tobacco, 647
Statistical data
—electronic processing system, 93
Stomach substance
—acidified solvents for removal of salmonellae, 344
Storage at 4 C
—effect on infectious pancreatic necrosis virus, 623
Streptococcal cell walls
—acrylamide gell electrophoresis, 31
Streptococci
—analysis of group A, 31
Streptococcus cremoris
—in studies of lactic streptococcus starters, 805
Streptococcus faecalis
—effects of 2,450-megahertz microwaves, 106
Streptococcus faecalis var. *liquefaciens*
—extracellular proteinase, 639
Streptococcus pyogenes
—effect of incubation temperature, 878
—T-agglutination typing of, 878
Streptococcus sanguis
—relation to soil isolates, 208
Streptococcus species
—stimulation of *Lactobacillus* species, 280
—use in cheese starters, 280
Streptolysin O
—interaction with red cell stroma extract, 650
—neutralization of cytotoxic activity, 650
Streptolytic components
—*S. albus*, 232
Streptomyces
—antimycin A production, 102
Streptomyces albus enzyme complex
—effect on streptococcal cells, 232
—proteolytic and streptolytic components, 232
Streptomyces lomondensis sp. n.
—description of, 755
—production of lomofungin, 755
Streptomyces
—effect on *M. lepraemurium* in macrophage cultures, 750
Submerged culture
—for growth of *E. nigrum*, 847
 α -Sulfoaminopenicillins
—antipseudomonal activity, 881
—resistance to β -lactamase, 888
Surface sterilization
—with paraformaldehyde, 614
Surfactants
—effect on cell permeability, 242
—stimulation of enzyme production, 242
Suspended cell cultures
—compared with monolayer systems, 658
—growth of Rift Valley fever virus in, 658
Swimming pool chlorination and algicides
—evaluated with *P. aeruginosa*, 415
Systemic mycoses
—effect of pyrrolnitrin, 690
T-agglutination typing
—of *S. pyogenes*, 878
T antigens
—of bovine and canine adenoviruses, 914
T3 coliphage
—as a viral tracer, 256
—inactivated by glutaraldehyde, 645
—survival in aerosols, 256
—viability during extended storage, 256
Technicon autanalyzer system
—for assay of hemagglutinins to sheep erythrocytes, 726
—use with agarose gel column chromatography, 726
Temperature
—effect on *C. violaceum*, 169
—effect on growth of *Salmonella* in skim milk, 767
—effect on salmonellae in ground pork, 528
Temperature and relative humidity
—effect on airborne stability of T3 coliphage, 256
Terminal heat treatment
—for elimination of salmonellae from pancreatin, 344
Thermal inactivation
—of staphylococcal enterotoxin B, 906
Thermal injury
—effect on coagulase production of *S. aureus* MF-31, 836
Thermophilic *Streptomyces*
—production of thermostable alkaline proteases, 366
Thermopolyspora polyspora
—causative agent of farmer's lung, 454
—identification by immunofluorescence, 454
Thermostability
—of serum rubella antibody, 634
Thermostable alkaline proteases
—optimal conditions for production, 366
—production by thermophilic *Streptomyces*, 366
Throat cultures
—from patients with streptococcal infections, 412
—predominance of single strain of hemolytic streptococci, 412
—single colony for serological grouping and typing, 412
Thyroid
—acidified solvents for removal of salmonellae, 344
Tobacco
—isolation of *S. epidermidis*, 647
Transferable drug resistance
—among *Enterobacteriaceae*, 701
Transient electric arcs
—bactericidal effect, 48

- conductivity of discharge liquid, 59
- photon production, 48
- virucidal effect, 54
- Treponema pallidum*
 - enumeration by Morgan-Vryonis method, 665
 - fluorescent-antibody staining, 14
 - storage at room temperature, 335
- Trilevel gradient plate method
 - for determination of minimal inhibitory concentration, 329
- Trimethylsilyl profiles
 - differentiation of organisms, 262
- Triton
 - for control of *Mycoplasma* in animal cell cultures, 405
- Trypsin perfusion technique
 - for increasing cell yield from animal tissues, 524
- Tube dilution antimicrobial susceptibility testing
 - efficacy of a microtechnique, 707
- Tween
 - for control of *Mycoplasma* in animal cell cultures, 405
- Tween 80
 - compared with formaldehyde, 379
 - for inactivation of measles vaccines, 379
- Two-dimensional immuno-osmophoresis
 - of adenovirus type 7 antigens, 603
- Two spot-indole reagents
 - evaluation of, 923
- Type 3 parainfluenza virus
 - cold variant, 589
 - differentiation of cold variants from parent strain, 589
- Typhoid outbreak
 - immunofluorescence for detection of *S. typhi*, 507
- Ultraviolet radiation
 - poliovirus inactivation by, 1
- Ultraviolet red fluorescence
 - for identification of *B. melaninogenicus*, 760
- Unicellular organisms
 - estimating size and concentration, 214
- Urinary tract infections
 - use of phage typing in epidemiological studies, 721
- Urine
 - levels of cephalixin after oral dose, 457
- Vaccinia neutralization test
 - radioisotope assay, 41
- Vacuum-cleaning system
 - for cleaning isolation chambers, 291
- Vacuum probe
 - microbiological sampling of surfaces, 164
- Vegetable preservation
 - by fermentation, 10
- Veronal
 - inhibitor of bacterial spore germination, 372
- Viral agents
 - survival in acetone at -60°C , 775
- Viral contamination in viral stocks
 - method for testing, 17
- Viral stocks
 - testing for contaminants, 17
- Viral tracer
 - T3 coliphage, 256
- Virus in tissue
 - inactivation by glutaraldehyde, 645
- Virus-induced enzymes
 - radioisotope assay, 41
- Viruses
 - inactivation by ethylene oxide gas, 790
- Vitamin B₁₂
 - produced by *Micromonospora*, 648
- Washing procedure
 - compared with direct inoculation procedure, 897
 - for examining almonds for *E. coli*, 897
- Water pollution abatement procedure
 - microbial sulfate reduction, 297
- Water supplies
 - method for detection of *E. coli*, 399
- Western equine encephalitis vaccine
 - assayed in hamsters, 927
- Wet-mount staining technique
 - for identification of *Sphaerotilus*, 320
- Wildlife
 - nutrition and rumen ecology, 819
- Wood's light
 - for viewing open wounds, 760
- Wool gabardine
 - as a vehicle for virus, 790
- p*-Xylene
 - oxidized by two pathways in *N. corallina* V-49, 853
- Yeast cell walls
 - prepared in a new type of disintegrator, 462
 - purity determined by infrared spectral analysis, 462
- Yeast mannitol antibiotic agar
 - for selective isolation of *Rhizobium*, 769
- Yeast Nitrogen Base broth
 - for susceptibility testing with 5-fluorocytosine, 871
- Yellow fever vaccine
 - comparison of different seed lots, 866
- Zearalenone
 - assay for in corn samples, 765
- Zonal ultracentrifuge
 - for concentration and purification of herpesviruses, 636
